

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	19 September 2022
Team ID	PNT2022TMID53509
Project Name	Visualizing And Predicting Heart Diseases With An Interactive Dashboard
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

1. 10 minutes (optional)
2. 1 hour to collaborate
3. 24 people (recommended)

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

1. 10 minutes

- Team gathering: Before you start brainstorming, it's important to make sure everyone understands what each other's roles.
- Set the goal: Make sure everyone understands the problem you're trying to solve and the brainstorming process.
- Agreement to participate: Make sure everyone is on the same page and ready to participate.

10 minutes

Define your problem statement

What problem are you trying to solve? Frame your problem as a few short, clear statements. This will be the focus of your brainstorm.

1. 10 minutes

Problem

Visualizing and Predicting Heart Diseases with an Interactive Dashboard

Key rules of brainstorming

Brainstorming is a creative process.

- Use a rule: Use a rule to guide the process.
- Exchange ideas: Exchange ideas with others.
- Use a rule: Use a rule to guide the process.
- Use a rule: Use a rule to guide the process.

Brainstorm

Write down any ideas that come to mind that address your problem statement.

1. 10 minutes

Salesh Babu	Pradeep Rahul	Ravichandran	Sujeeth Kumar
Can we use classification model?	Decision tree and Linear model will be good	More multiple classifiers to give the prediction	Use Neural network layer
Use sugar level to predict	perform metrics	Make threshold as the main attribute	Use statistical and visualized images
Use c4.5 algorithm to check for correct prediction	Perform confusion matrix		Use Naive Bayes classification as the best model

Brainstorming is a creative process.

3

Group 1000

The tutor shares your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you—and maybe a few other sub-groups,

28 minutes

Identify the best feature to find the possibility of heart attack

How to efficiently use the neural networks to find the heart disease

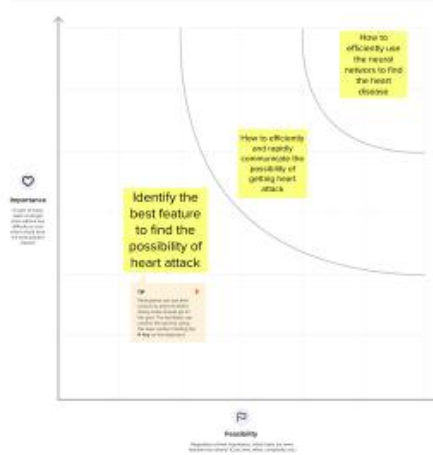

- How to efficiently and rapidly communicate the possibility of getting heart attack

Non-communicable diseases
such as cancer & cardiovascular
disease together with
infectious diseases such as
HIV/AIDS and TB

Price/Share

Your team should all be on the same page about what's important moving forward. Place your ideas in this grid to determine which ideas are important and which are feasible.

30 minutes
